

YOU WOULDN'T FLUSH MONEY, WOULD YOU?

What you think is flushable can damage sewer pipes and pumps. Most products do not break down the way toilet paper does. Many so called "disposable" items are NOT flushable and should be put in your trash. Non-flushable items such as grease clog pipes. Other items like wipes make their way to the Wastewater Treatment Plant and wrap around equipment. The result is costly repairs. Ka-Ching!

YOUR TOILET IS NOT A TRASH CAN!

Please Do Not Flush These Items

wipes	grease or fat	medications	dental floss	gum
diapers	cooking oils	syringes	applicators	cigarettes
paper towels	coffee grounds	bandages	tampons	chemicals
facial tissue	eggshells	cotton balls	napkins	solvents
hair	kitty litter	cotton swabs	condoms	paint

It's a struggle to maintain our aging infrastructure. We really ought to put our money into that, instead of continually having to take apart pumps clogged with non-flushable items. It's expensive and time consuming to unplug, repair or replace damaged pumps and other equipment.

NO WIPES IN THE PIPES!

CEASE THE GREASE!
